## Note

Il colore delle tessere di mosaico non è mai perfettamente uniforme né omogeneo, i colori non possono essere riprodotti in maniera esatta, essendo le variazioni di colore una caratteristica intrinseca del prodotto. Per le stesse ragioni STON non può garantire la riproducibilità esatta del colore o delle gradazioni di colore dei campioni mostrati nel catalogo o in ogni altro espositore.
Le piccole scalfitture e le imperfezioni superficiali presenti in alcune tessere sono caratteristiche del prodotto e del procedimento industriale. Tali irregolarità non possono quindi costituire motivo di contestazione.
Per un risultato ottimale, il supporto destinato alla posa del mosaico deve avere una superficie perfettamente liscia, regolare e bianca, deve aver raggiunto adeguata maturità, consistenza e stabilità.
Si consiglia l'uso del collante H40 Tenaflex di Kerakoll* e del sigillante Fugalite® Eco di Kerakoll*.
Per la manutenzione e la pulizia delle superfici in mosaico vetroso utilizzare detergenti di uso comune (non quelli contenenti acido fluoridrico o fosforico), avendo cura di risciacquare abbondantemente con acqua. Evitare detersivi alcalini.

**Antisdrucciolo**

Tutti i colori sono realizzabili su richiesta nella versione antisdrucciolo per ordini minimi di mq. 10.
Il prezzo va calcolato sommando al prezzo scontato del materiale, il costo netto di 30,00 €/mq per la lavorazione.

**Mix personalizzati**

Sono realizzabili miscele personalizzate (max. 5 colori) con le seguenti modalità:
1. Tempi di consegna di 60/70 giorni, costo aggiuntivo del 15% sul prezzo scontato della miscela di riferimento.
2. Tempi di consegna di 15/20 giorni, costo aggiuntivo di 30,00 €/m² sul prezzo scontato della miscela di riferimento.

Per ulteriori informazioni si prega di contattare il nostro ufficio commerciale al numero +39 0187 632455, info@stonitalia.it.

*** Per le modalità applicative attenersi scrupolosamente alle indicazioni del produttore (www.kerakoll.it)**

**Controllare il materiale prima della posa, non si accettano contestazioni sul materiale posato.**

## Notes

The colour of the mosaic tiles is never perfectly uniform, nor homogeneous; the colour variations cannot be reproduced exactly because they are an intrinsic feature of the product. For the same reason, STON doesn't guarantee that it will reproduce exactly the colour or shade samples as shown in the catalogue or in any other displays.
Slight scratches and surface imperfections, in some tiles are inherent of the product and the manufacturing process. Therefore they are acceptable and they do not constitute a reason for any claim.
For best results, the base must be smooth, flat, white, mature, compact and stable.
We recommend to use the adhesive H40 Tenaflex by Kerakoll* and sealant Fugalite® Eco by Kerakoll*.
For maintenance and cleaning of glass mosaic use ordinary cleaning products (except those containing hydrofluoric or phosphoric acid), being careful to rinse thoroughly with water. Do not use alkaline cleaning products.

**Anti-slip**

All colours can be produced in the anti-slip version upon request. A minimum quantity of 10 sqm is required.
The price is to be calculated by adding 30,00 €/sqm to the discounted price.

**Mix on request**

Customized blends can be created upon request (max. 5 colours) under following conditions:
1. Delivery within 60 up to 70 days, 15% extra charge on the discounted price of the reference blend.
2. Delivery within 15 up to 20 days, 30,00 €/sqm on the discounted price of the reference blend.

For any further information please contact our sales department on +39 0187 632455, info@stonitalia.it.

*** Please be sure to observe the manufacturer's instruction (www.kerakoll.com)**

**Check material before installation. Claims on installed material will not be accepted.**

## Remarques

La couleur des tesselles de la mosaïque n'est jamais parfaitement uniforme ni homogène; les couleurs ne peuvent pas être reproduites de façon exacte, puisque les variations de couleur sont une caractéristique du produit. Pour ces raisons, STON ne peut pas garantir la reproduction exacte de la couleur ou des gradations de couleur des échantillons présentés dans le catalogue ou dans toute autre mobilier pour salle expo. Les petites ébréchures et les imperfections présentes sur la surfaces de certaines tesselles sont des caractéristiques du produit et du processus industriel. Ces irrégularités ne peuvent donc pas constituer un motif de réclamation. Pour obtenir un résultat optimum, le support qui va être revêtu doit être parfaitement lisse, régulier et blanc, il doit se révéler solide et stable.
Nous conseillons l'utilisation de la colle H40 Tenaflex di Kerakoll* et du mastic Fugalite® Eco di Kerakoll*.
Pour l'entretien et le nettoyage de la mosaïque en pâte de verre, utiliser simplement des produits de nettoyage (n'utiliser pas de produits qui contiennent de l'acide fluorhydrique ou de l'acide phosphorique), et rincer abondamment à l'eau. Ne pas employer de détergents alcalins.

**Mosaïque antidérapante**

Toutes les couleurs peuvent être réalisées sur demande avec finition antidérapante pour des commandes d'une quantité minimum de 10 m². Le prix est calculé en ajoutant 30,00 €/m² au prix remisé du matériel.

**Mélanges personnalisés**

Les mélanges personnalisés (maximum 5 couluers) peuvent être réalisés selon les modalités suivantes :
1. Délai de livraison 60/70 jours, coût supplémentaire de 15% sur le prix remisé du mélange standard.
2. Délai de livraison 15/20 jours, coût supplémentaire de 30,00 €/m² sur le prix remisé du mélange standard.

Pour toute information supplémentaire, veuillez contacter notre bureau commercial au +39 0187 632455, info@stonitalia.it.

*** Suivre attentivement la notice d'utilisation du producteur (www.kerakoll.com)**

**Veuillez contrôler le matériel avant la pose. Nous n'acceptons pas de réclamations constatées après pose.**

## Anmerkungen

Die Farbe der Mosaiksteinchen ist niemals vollkommen gleichmäßig, noch homogen; sie kann nicht exakt reproduziert werden, da genau diese Abweichungen eine Charakteristik des Produktes darstellen. Aus dem gleichen Grund kann STON eine exakte Reproduzierbarkeit von Farbe oder Farbschattierungen, wie sie in den Mustern im Katalog oder in den Ausstellern zu finden ist, nicht garantieren. Kleine Kratzer und Oberflächenfehler, welche in einigen Steinchen sichtbar sind, sind Eigenschaften des Produktes und des Produktionsprozesses. Diese Unregelmäßigkeiten sind somit kein Beanstandungsgrund.
Für ein optimales Ergebnis, sollte der Verlegeuntergrund glatt, flach, weiß, reif, kompakt und stabil sein.
Wir empfehlen den Kleber H40 Tenaflex von Kerakoll* und das Dichtungsmittel Fugalite® Eco von Kerakoll*.
Zur Erhaltung und Reinigung des Glasmosaiks, raten wir gewöhnliche Reinigungsprodukte (außer die, welche Fluß- oder Phosphorsäure enthalten), immer gründlich mit Wasser nachwischen. Alkalische Reiniger vermeiden.

**Rutschhemmende Ausführung**

Alle Farben können auf Anfrage mit rutschhemmender Oberflächenausführung angefertigt werden; Mindestauftragsmenge 10 m2.
Der Preisaufschlag beträgt € 30,00/m2 auf den Nettopreis.

**Sondermischungen**
